

Srijit Paul

The Ultimate Developer

Computer Science undergraduate pushing the boundaries of web architecture. Scaling ideas from competitive hackathon sprints to production-ready platforms. Architecting distributed systems, immutable audit ledgers, and hybrid AI diagnostics to turn complex problems into high-performance products.

EDUCATION

B.Tech in Computer Science

Adams University

2023 – Present (5th Semester)

ISC Science [85%] & ICSE [88%]

International Public School

Graduated 2023

EXPERIENCE

Hackathon Leader & Core Member

SIH 2025, GDG Kolkata & Code Leagues

- Directed multidisciplinary engineering teams to architect and deploy scalable, full-stack solutions under intense time constraints (Smart India Hackathon 2025).
- 1st Place Winner at Coding Premier League (Signifiya) and Innovate X (IMI Kolkata), dominating competitive programming sprints.
- Active contributor to the campus Google Developers Group, focusing on native integration of Gemini AI models.

PROJECTS

Dr. Brinjal — Hybrid-AI Diagnostic

Lead Architect (2026)

- Engineered an immersive, high-fidelity agricultural diagnostic platform leveraging a dual-tier hybrid AI system for crop pathologies.
- Integrated real-time edge-ML gatekeeping (ResNet50) achieving sub-0.8s inference speeds with 94%+ average accuracy.

Sanchay — AI Financial Sanctuary

Lead Developer (2026)

- Architected a gamified financial mentor, routing heavy AI-driven wealth forecasting algorithms through Python-based FastAPI.
- Maintained ultra-low latency (<15ms) via Neon DB and deployed a 24/7 automated Telegram Bot pipeline for real-time fiscal nudges.

SKILL

React, Next.js, Tailwind CSS

FastAPI, Node.js, PostgreSQL

Gemini API, TensorFlow, Edge ML

Photography and Photo editing
